Commentary

The K2 Asian Fund returned +4.05% for the month of June.

Asian equity markets rallied strongly in June to post their best quarterly performance since 2009. A combination of central bank liquidity, enormous government stimulus packages and lack of alternative growth options are outweighing the gloomy economic reality of main street and spiking case numbers in large parts of the world.

Despite the underlying positive trajectory, volatility increased in June as investors reacted to news flow surrounding virus updates and the US-China trade war. As economies continue to gradually re-open a bumpy ride is to be expected. Meanwhile the trade war took an interesting twist with senior White House advisor Peter Navarro sending markets into a tailspin when he said that the deal with China is "over" in a Fox News interview only for the comment to be retracted hours later. For us, this serves to highlight how jumpy markets are to the threat of any negative news.

Within Asian markets a rising tide lifted all boats. Hong Kong (6.4%) and India (+7.5%) were the better performing countries. Taiwan (+6.2%), Mainland China (+4.6%) and Korea (+3.9%) also fared well.

A significant positive contributor for the month included Tencent, China's leading social networking and on-line gaming company. The stock gained 21% as Chinese consumers turned to online entertainment during lockdown with demand surging for mobile games. Currently trading on a 2021e PE of 29x with earnings forecast to grow at 22% p.a over the next 2-years it remains a core holding for the fund.

The fund ended the month with a net exposure to equities of 96% reflecting our overall optimistic stance.

The AUD ended the month up +3.34% versus the USD at 0.6890. The fund is currently 90% hedged to the AUD providing capital protection against a rising AUD.
